

ABOVE FLOOR ROUGH-IN

ALL-AROUND VERSATILITY

**STANDARD SKIRTED TUB
INSTALLATION**

**ABOVE THE FLOOR ROUGH-IN
INSTALLATION**

Valley's Above Floor Rough-in (AFR) skirted bathtubs have an extended apron/skirt for above the floor rough-in and are only available for plain skirted baths. These bathtubs are designed to provide some extra clearance for the drain pipe directly under the bathtub. This would save you time as well as cost, as relocating the existing drain would not be necessary. This customization option is perfect for concrete slab installations, renovations and new construction projects.
