...you dream it, we create it

Maintenance for Your Acrylic Product

For daily cleaning, use hot soapy water and vinegar.

For acrylic surfaces, occasional use of a special acrylic surface cleaner will add luster and protect the finish.

Removing joint compound: Use a plastic or wood spatula covered with a damp cloth. Do not use a metal blade or a metal brush. If a rubber mat is used, it must be removed immediately after each use.

Do not use abrasive cleaners, scrapers, metal brushes, or any items or products that could scratch or dull the surface.

Ignoring this recommendation will cause damage not covered by the warranty.
